EDUCATION

2020-Present   **Software Engineering**

Addis Ababa Science and Technology University   A.A, Ethiopia

2015-2019   **High School**

Falcon Academy   A.A, Ethiopia

TECHNICAL PROFILE

Language: *Python, Java, JavaScript, PHP*

Platforms and Frameworks: *ReactJs, Flutter*

PROJECTS

1. *TODO app – individual project*

• I implemented this android app using Rest API

• The app has a flutter application which enable users to create, read, update and delete tasks

• The tasks are stored on the server

2. *Students Access Center website – Group project*

• This project is designed for university students who live in campus to access nearby services like online shopping, laundry, hair salon and book store service.

• I was the back-end developer of the website

• To build the website we used HTML, CSS and JS for front-end development and PHP for back-end development

3. *Personal Portfolio website – Group project*

• Me and my teammates have built a personal website used to showcase our skills and accomplishments in detail.

• we used React as a front-end library

• we also used React-bootstrap as a CSS-framework
